The general distributor for the sale and supply of "Tinowa" suspension in Europe is "A Tinowa s.r.o."

Form release.

Cosmetic "**Tinowa**" suspension is made from an active balneological peloid (Certificate No. 14-0491 T / ITC), produced from ancient peat silt from a deposit in northern Germany, and a magnesium salt called "Bischofit".

The connection of these components is carried out on special technological equipment and is activated by special technologies

Packing of the suspension is made in plastic jars with a lid in volume:

I. Plastic cans per one liter of suspension in one packing box with instructions for use - 4 plastic cans. The average weight of the box is up to ≈ 5.76 kg.

Under the order delivery of suspension in plastic cans:

I. Plastic cans with a suspension of "Tinowa" 3.5 liters, weight ≈ 4.930 kg, packed in a cardboard box for dispatch.

II. Plastic cans with a suspension of "Tinowa" 5.5 liters, weight ≈ 7.790 kg, packed in a cardboard box for dispatch

III. Plastic cans with a suspension of "Tinowa" 2.5 liters, weight ≈ 3.5 kg, two cans in one box for delivery, total weight $\approx 6,590$ kg

IV. Plastic cans with a suspension of "Tinowa" 3.0 liters, weight ≈ 4.2 kg, two cans in one box for delivery, total weight $\approx 8,200$ kg

- ❖ Labels and bar code are placed on plastic cans, a control label connecting the jar with the lid, all labels in the language of the recipient country.
- ❖ Plastic cans with instructions for use are placed in a carton.

- ❖ The packaging box has a label on the outside with a bar code in the language of the recipient's country.
