

Body rehabilitation kit

Cardboard box: 3 thermophores and 12 packages of cosmetic suspension (1 liter/1.3 kg) for sending prototypes: procedures - baths and applications with bioenergetics suspension "Tinowa"

Natural thermoform for applications on body parts 30x40 cm - 2.1 kg

Natural thermoform for applications on the collar area 30x40 cm 1.9 kg

Natural thermoform for applications on the collar area 30x40 cm 1.9 kg

Thermophores contain a special natural peloid inside a dense material, have different sizes and a long service life (12-month warranty), and are heated in water to a temperature of 65°C. Thermophores are used for applying suspensions to the body

Certification of the «GU Expertise EU» of the Ministry of Health of the Czech Republic on September 27, 2021 on safety for the body during use and the standards of the EU Parliament

The suspension was certified in the territory of the countries of the Eurasian Union by the Ministry of Health of the Russian Federation on 19.08.2021.

The energy of the lithosphere and the effects of quantum nonlocality of electron transfer into the body for the rehabilitation of injuries, injuries to joints and muscles, depression, capillary circulation and body health.

TO: CEO

Dear colleagues, we would like to present you the innovative commercial proposal!

The researches in the field of the quantum biophysics revealed the extraordinary law of the quantum **non-local effect of liquid-phase systems to transfer the charged electrons** in the space. On the base of the natural components of lithosphere being in the liquid-phase state the non-local effect allows developing the new preventive methods and rehabilitation means to protect the living functions of the human organism. The monographies, books, articles are written and published, and the international conferences are held.

The high anthropogenic load in the countries and change of the electrophysical state of the planet led to the low content of electrons in the environment (lithosphere) and in the living organisms (absorbed by technologies). This caused the significant growth of the **non-communicable diseases (NCD)**: cardiovascular diseases, oncology, musculo-skeletal system, chronic respiratory diseases, type II diabetes, etc. The main reason of NCD is **the decrease of the electron production** by hydration structures of lithosphere colloids (*in other words, sediments*), caused by the man-caused burden and the availability of the amorphous materials in the living environment of the person. This situation in the world led to the development of a new risk factor for the health and life of a person – **electron deficit in the environment**, leading to the stresses in the work of the regulatory systems of the organism of a person. This situation was discussed during the conference of the WGO in Geneva in 2016.

The impact of electrons of the environment on the living organisms is a non-local effect in time and space subordinated to the quantum regularities. This leads to the replacement of ortho-isomers for **para-isomers** in the biological structures that help to prolong the life. The strong and sustainable internal connection of Wolfaren pentamers (WP) created by the nature allows them living for 10^6 years or million years. A person has 10 - 20% of WPs, that are located along all meridians in the organism of a person forming the chains of the WPs in the active points of the body. Mitochondrias are surrounded by the network of the PVs. The younger the person is, the thinner WP is and the bigger number of them is. The PWs are destructed by the isotopes with age and their number is decreasing.

Due to its **non-local connection with lithosphere**, the suspension “Tinowa” maintains the PWs and the energy of mitochondrias providing the inflow of electrons into the organism. The availability of the magnesium salts of bischofite in suspension has a positive impact on the joints, muscles, CVS, psychosomatics, etc. as the practical use of the suspension demonstrated. The combination of the magnesium salt (Bischofit) and balneological peloid from Lohne - Südlohne (Oldenburg) produced during the manufacturing process using the information technologies provides the suspension “Tinowa” with a wide range of rehabilitation impact.

The clients will get the new procedures of the preventive medicine in your hospital, resort, medical center, spa-salon, etc. This suspension has no analogues. The complete information you will find in the scientific grounding and information advertisement of the suspension use on the site www.bioactivwater.com

Presentation: plastic jar 1 liter - 4 jars of 1 liter per one cardboard box. The suspension is delivered in 2.5 or 3.0 liters (2 jars in one box) and 3.5 or 5.5 liters (one jar in one box) of the ordered quantity

The suspension “Tinowa” is used successfully in the Czech Republic and Germany. You can find the cost of suspension and terms of delivery on www.bioactivwater.com Favorable prices – EXW: storage in Karlovy Vary, Czech Republic.

The delivery of the batch of suspension is according to your order. You can purchase a test batch - 12 packages of one liter suspension packed in film with natural thermophores. This will allow you to estimate the opportunities of the suspension and take the decision about the purchase for the extension of your services range. Looking forward for cooperation and your response.

Best regards,

Dr. Igor Oberemko, CEO

International expert in the problems of quantum biophysics of water and methodology of water health-improving technologies.

Energy of electrons in time and space of the universe is the eternity of spirit and materia!

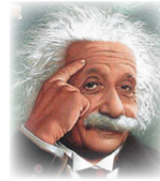

Georg Wilhelm Friedrich Hegel, the great German philosopher and one of creators of the idea of quantum physics said that the motion was expressed by the unity of discretization (stippling) and continuity of time and space.

Niels Bohr Bop:

“If quantum theory did not impress you – you have not understood it yet”.

Werner Heisenberg: “Atoms or elementary particles ... form the world of more probably potential opportunities than things and facts”.

Albert Einstein:

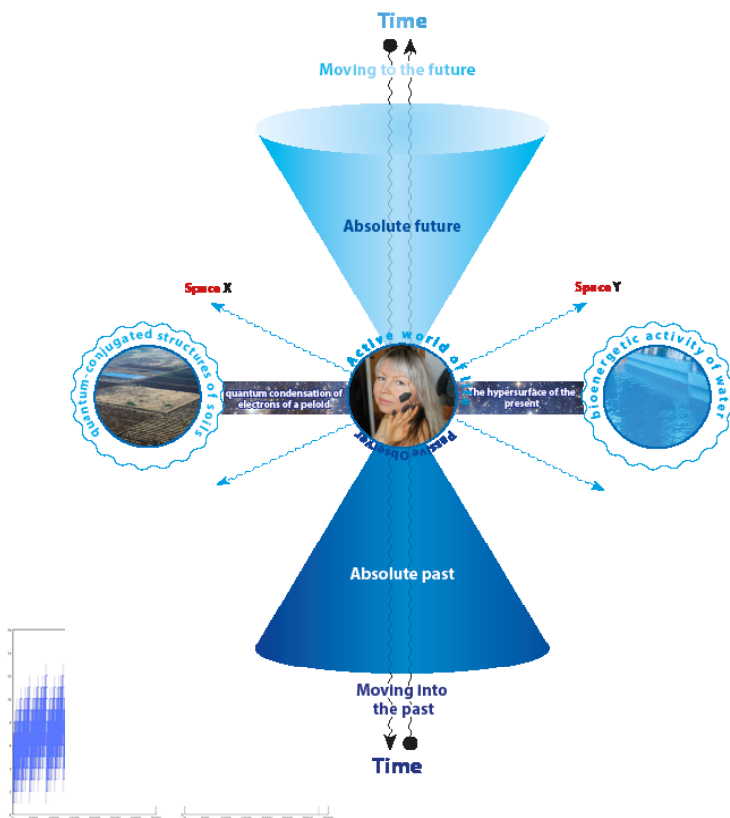

“the material medium of gravity is the space itself (more precisely, space-time)”.

The sedimentaries of lithosphere that include peloid or peaty mud (component of suspension) serve as the sources of electrons. Seldom ground bioactive waters located far from the areas of anthropogenic impact. Unfortunately, the number of the specified natural sources is decreasing on the planet.

The breach of the natural chain: the inflow of electrons from lithosphere → Wolfaren pentamers → mitochondria cells (main source of energy) is a transformation of the electromagnetic energy into the chemical reaction, etc. breaches the functions of organism.

Obtaining of the charged electrons of lithosphere by the living organism when using the suspension that contains the natural peloid is made as a result of the effect of non-local connection formed between the organism and the deposit of peloid. The impact of electrons of the environment on the living organisms is a non-local effect in time and space subordinated to the quantum regularities. This leads to the replacement of ortho-isomers for **para-isomers** in the biological structures that are directed to the life prolongation.

Suspension “Tinowa” is important as a preventive means of protection of an organism, for a wide range of people of the different professions:

“A person is immortal due to the cognition. Cognition, thinking is a root of his life and his immortality”.

G.W.F. Hegel.

Universe and the Nature know how to heal and whom to save

Made
in EU

Information-wave technologies and natural components of the «Tinowa» suspension

make life joyful and successful by saturating the body's cells with electrons from the lithosphere and the Universe in procedures with the "Tinowa" quantum suspension!

Regeneration and Rehabilitation - Increased immunity

Skin, Muscles and Joints

Locomotor apparatus, traumatism

Eliminate pain, osteochonrosis and arthrosis etc

www.bioactivwater.com

Mental joy and mood

Cardiovascular and nervous system, dementia prevention

Elimination of depression and stress, restoration of vigor

Non-local effects of quantum biophysics allow the «Tinowa» suspension to connect you with the lithosphere, saturate the body with electrons, and live long and actively!

Samples by mail - cardboard box: 3 special thermophores (6.1 kg) and 12 packages (12.5 kg) of suspension (1 liter each) for a course of trial rehabilitation procedures: baths and applications on the body - **295 EUR + postage**. When ordering after a trial batch, we send 24 packages (1 liter) of suspension in a procedure box - **354 EUR + postage**. **Information and certificates on the website.**

Orders: doctor@tinowa.com

Made in Tinowa Group

NO ANALOGUES

Electron transfer provides most of the body's energy

The energy of mitochondria in cells disappears, life itself disappears

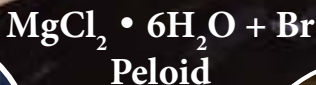

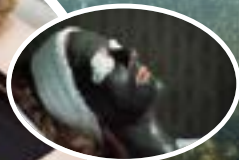

The lack of electrons in the body's cells awakens diseases

Tinowa body suspension

100% natural
product

with magnesium salt and bromides (bischofite)
in combination with balneological peloid

Masks, local applications, baths.

*Electrons of lithosphere for energy of the body and protection
of human health against technological load and non-contagious diseases.*

*MgCl₂, MgBr₂, CaSO₄, CaCl₂, CaHCO₃, KCl, NaCl, Br, B, I, Cu, Rb, Mo, Ti, Li, atd.
To be applied by: Population, musicians, drivers, IT-specialists,
sportsmen, military officers, etc.*

*Rehabilitation: skin and muscles,
musculoskeletal system and joints,
cardiovascular and nervous systems.*

*Degenerative disc disease
and degenerative joint disease
Mood enhancement
Depression and stresses.*
